TABLE OF CONTENTS

TABLE OF CONTENTS / 3D PRINTING

MARKFORGED (INSTALLATION) - 1 day	<u>8</u>	<u> 36</u>
DESIGN FOR ADDITIVE MANUFACTURING	(DEAM) = 1 day	37

Solidxperts | 35 solidworks

MARKFORGED (INSTALLATION) - 1 DAY

Preparation 1.

- Unboxing .
- Verifying Boxes Content
- Printer Installation .
- Plugging the Printer on the Network

2. Introduction

- SolidXperts Introduction
- Good Use of 3D Printing
- Comparison Against ABS •
- Useful Web Pages
- **Eiger Account Creation**
- Introduction to STL files •

3. Maintenance and Calibration

- **3D Printer Components**
- . The Use of USB Key
- Leveling Technic •
- Fiber Nozzle Adjustment
- Test Prints
- Nozzle Cleaning
- Plastic and Fiber Nozzle Replacement .
- Wet Plastic Purge
- XY Adjustment
- Strap Tensioning

5. Advanced Operations

- Menu Options
- Fiber/Sandwich Technic
- Type of Fiber Filling
- Part View and Internal View
- Visibility Options
- Completely Filling a Part of Fiber
- Completely Filling a Part of Plastic
- Helping the Fiber Pathing by Changing the Geometry
- . Helping the Fiber Pathing by Changing the orientation of the Part
 - Brim
- Opening a Request to MarkForged
- Saving the Logs

Questions 6.

- Questions .
- Starting a Print with a Custom Part

4. Informations

- Part Glue
- Print Information .
- **Mechanical Properties**

Course Objectives : At the end of each course, students will know the capabilities of the software and will be able to use the learned features. Training Course : Training is given in class at SolidXperts or online where each student has access to a workstation or online product version. Methodology: Training is based on case studies demonstrated by the instructor. At the end of each lesson, time will be given for exercises. Competences Evaluation : During the classwork, the instructor will correct the exercises on-demand and explain the solutions to the entire class if needed.

Instructor: SolidXperts trainers are Certified SolidWorks Instructors (CSWI) and authorized by Emploi-Québec.

Course Materials : One or more training manuals are included with the training course.

Attestation : A certificate will be given to each student at the end of the course to attest to the successful completion of the requirements for the course.

Back to summary

solidxperts | 35 solidworks

DESIGN FOR ADDITIVE MANUFACTURING (DFAM) - 1 DAY

1. What is Additive Manufacturing?

- Brief history of additive manufacturing
- Examples of uses

2. Basic Principle of Technology

- Mechanical operation
- Special features of the FFF process
- Strengths and weaknesses of the technology

3. Presentation of Printing Materials

- ABS and PLA
- Onyx
- Continuous fiber

4. Overview of Printing Software

- Creation of an STL file
- Example of printing software

5. Producing Efficiently

- Choose the right orientation
- Limit the use of support material
- Limit weaknesses (sense of impression)
- Limit printing time
- Support behavior

6. Questions to Ask Yourself Before Producing a Part

- Purpose of manufacture
- Usage environment
- Duration of use
- Number of parts to manufacture
- Technologie available

7. Adaptation of the design according to the type of manufacture and use

Machining mode of thinking vs. Additive manufacturing

8. Design Optimization for FFF Additive Manufacturing

- Precision and tolerances
- Wall thicknesses
- Minimum dimensions
- Reduce stress
- Chamfer vs. Rounding
- Limit fragility
- Surface quality
- Cost and manufacturing time

9. Tips for Greater Durability

- Wear parts and technology integration
- Use of purchased parts
- Thread
- Pause while printing

10. Scenarios

- Prototyping
- Tools

Course Objectives : At the end of each course, students will know the capabilities of the software and will be able to use the learned features. **Training Course :** Training is given in class at SolidXperts or online where each student has access to a workstation or online product version. **Methodology :** Training is based on case studies demonstrated by the instructor. At the end of each lesson, time will be given for exercises. **Competences Evaluation :** During the classwork, the instructor will correct the exercises on-demand and explain the solutions to the entire class if needed.
